

Full stack Development

A 6-month program to help you to be ready
for global opportunities.

PROGRAM

Engineering is often over-simplified to just Coding but to deliver a good customer experience, one needs more.

So here we have designed a wholesome curriculum where we do a refresher on key fundamentals, move on to Engineering design and implementation in detail and focus on the larger lifecycle of product building.

This 25-weeks mentor-led training program is split into 16 weeks of Theory + 7 weeks of Practice + 2 weeks of dedicated Interview Prep.

PROGRAM STRUCTURE

Part-time program with a structured curriculum & time flexibility.

Features

- 1:1 Mentorship Sessions
- Weekend Live Lectures
- Career Support
- Vibrant Community to help people collaborate
- Project Showcare
- Certificates
- Access to top mentors

Curriculum Highlights

- Industry vetted and reverse engineered course
- Help you become a FullStack Product Engineer
- Personalised up-skilling in smaller cohorts of 5–10 students
- Equal focus on theory and practice/ project building
- High focus on problem solving and design thinking
- Deep knowledge of CS fundamentals (including DSA)
- Proficiency in system design (HLD and LLD)
- Weekly assignments and questions
- Dedicated soft skills workshops to make you remote-ready
